Mr.Francis, q.c., leaves to-morrow for Manila to defend the Hongkong & Shanghai Bank in the action that has been raised against it. A wag suggested to us that he should put the Volunteers on board the Filipinas, or the Government should carry out the go down with her and blow up the 'cussed reclamation on its own account, paying place.' Some rather amusing stories are equitable compensation for any injury to told of how the Spanish officials, with pompous ceremonial, attached their scals to two decided that in any case negotiations have huge safes, one of which contained a dollar and the other ten dollars; and it is said that while the front doors were closed and Goods per Ningchow undelivered after the official seals affixed to them, business was going on briskly by the back doors of the Bank. Of course, now that security has been given, the business of the Bank is going

> on quite normally. THE alterations in the Praya Reclamation Ordinance provide for the recognition of section holders on a footing with lot-holders; and there is an additional section which

runs as follows :-8. Nothing in this Ordinance shall be deemed to recognise any foreshore rights As a Pomade, it is not a grease but acting | whatever as against the Crown; nor shall anything herein be deemed to affect any right or claim as between holders of lots and acctions and their sub-lessees or tenants interse.

A PERSON arrayed in full Highland costume

caused (a correspondent writes) terrible

commotion in a railway carriage at the Perrache station, Lyons. Two ladies who were in the carriage shricked as they saw the awful speciacle presented by the entry 462 into their compartment of a man without pantaloons. The Highlander, who was on his way to Nice, nevertheless, took his seat with Caledonian coolness, whereupon the ladies screamed the louder. It was in vain that the apparition in the garb of old Gaul apologized and explained the situation in bad French, and equally futile were the efforts of the station master, who assured the ladies that the gentleman with the dirk, the sporran, and the tartan accessories or properties was perfectly You don't run the shadow of a risk, Mesdames, insisted the stationmaster in his blandest tones. The gentleman comes from a country where the men wear petticoats and do not wear trousers. Despite everything, however, which was said in order to calm their apprehensions, the over-timid lady travellers had to be placed in a carriage at a safe distance from that in which the Caledonian stern and wild had taken up his position. - Pall Mail Cazette.

THE MESSAGE ON THE PRAYA RECLAMATION SCHEME.

WILLIAM DES VŒUX. The Governor has given directions that there shall be laid before the Legislative Council an Ordinance to be entitled . The Prays Reclamation Ordinance. 1889. containing the necessary provisions for carrying out a great scheme of reclamation in front of the central and western portions of the Town of Victoria.

Though the general nature of the schemo and the manner in which it is proposed to be carried out have become well known to Honograble Members and to the community, the various questions connected with this great undertaking are now for the first time brought under the consideration of the Legislative Council; and it may be well therefore to make a short statement A NUMBER of interesting telegrams from on the subject for the information of interested persons outside the Colony, and for the purpose of convenient reference in the future.

The project for carrying out which it is the object of this Ordinance to provide, is shortly as follows :--

To build a cut-stone sea-wall in front of the present Prays and at an average distance from it of about 260 feet, along its whole length extending from the War Office property at the North Barracks to the Gas Works, a distance of some 3,400 yards, or nearly two miles. To fill in with earth and stone the. intorvening space, comprising an area

of some 56 acres, in such a manner that it shall be available for building purposes : and To construct upon this reclaimed area the necessary streets with all requisite channels and sewers, a work which, besides a considerable number of cross-streets, will include a new Praya, 75 feet in width along the whole length of the new sea-wall. and the widening to 75 feet for a similar distance of the present Praya which will thus become an inland

The cost of all these works, the amount which is estimated at somewhat more than \$2,500,000, is to be defrayed by the owners of the marine frontage affected by the proposed reclamation, on the terms arranged in the correspondence which has been published, and now expressed in this

As however the maintenance of the new

sea-wall when completed will be a charge on the public funds, it has been deemed necessary that its construction should be under the strict supervision of the Government. So that for this reason and on other grounds of obvious convenience the whole of the works will be undertaken by the Surveyor General's Department, under a special MR Sangeter will give his next Organ Re- Engineer appointed for the purpose. Though the owners of frontage lots, as the Governor is advised on high authority, are not in a position analogous to that of riparian proprietors, inasmuch as they have no immediate access to the sea (the foreshore having for many years been occupied by a wide public street), it is held that whatever may be their legal rights they have for various reasons, well understood here, a meral claim to compensation in respect of reclamations in front of their land. On this ground, therefore, and in order to avoid the endless litigation that would otherwise arise in respect of the complicated interests involved, it has been deemed right to come to terms with them, under which they will undertake the whole cost and risk of the work, and will receive in return a very large share of the profits, estimated from the present value of frontage land to reach the large total of over \$5,000,600. The Governor was of opinion that this profit on the part of the lot-holders was unduly large; and that either they should private rights. The Secretary of State however did not take this view, and has gone too far to impose any such stipulation now; and he according y sanctioned with some minor modifications the terms provisionally arranged with the lot-holders and approved the draft of the Ordinance now submitted for carrying them into

The Ordinance in its present form has therefore already received the careful consideration of Her Majesty's Government; and the Governor has much pleasure in giving effect to the Secretary of State's decision on the scheme, which, whatever the gain of individuals, is fraught with unquestionably great advantages to the public, These are shortly as follows :-

> (1.) The provision of some 32 acres of building sites, which, when covered with houses (as they are morally certain to be as soon as completed). will afford a substantial relief to the present congested condition of the Town of Victoria or at least will tend to prevent the still further overcrowding of that contiguous portion of the Town which already is probably more densely populated than any other

> drained land of the present poxious foreshore, which is becoming year by year a more serious nuisance, and involving an ever-increasing danger to the health of the community. (3.) A great improvement in the Port, as regards the conditions of discharging cargoes, arising from the fact

that vessels of large draught will be

able to lie alongside the proposed sea-

wall throughout its entire length,

and thus save considerable sums in (a.) The profit from that portion of the reclamation to be undertaken by the Government in front of its own property; the land to be thus reclaimed being estimated at the value of \$1,803,956. against an estimated cost of

Briefly summarised the pecuniary profit It will be observed that in the above es-

equal space in the world. (2.) The conversion into wholesome

lighterage. (4.) A large pecuniary gain to the Colonial Treasury consisting of .-\$362,369, showing a probable net profit of \$1,441,587.

(b.) A probable return estimated (according to the low rate of \$1 per square foot), at \$300,000. from land in Kennedy-town now useless, which will be converted into valuable building sites by the removal of rock and earth for the proposed reclamation. (c.) Rent from the sites last mentioned and from the reclaimed. land estimated at \$29,200 per

which is estimated as likely to accrue to the Government from this scheme is \$1,741,587 from land-sales and an annual income from rent amounting to \$29,200 timate of advantages no account has been

difficult to forecast at the moment how far the Colony. this sum will be absorbed by additional charges for Police Stations, Police, Lighting &c. It is no at all probable that these charges all reach so large a total or anything like it; but in setting forth the benefits of the scheme, the Governor desires to err, if at all, on

the side of under-statement. There is, however, another beneficial result which may be fairly added, as, though principally of an aesthetic nature, it is nevertheless a very appreciable one, viz the greatly improved appearance in the front of the Town which will be brought about by the supervision to be exercised in respect of the character of the buildings eracted.

In view of this catalogue of advantages, it cannot be doubted that the prosecution of this great scheme is in the strictest souse a 'public purpose,' as defined by the Ordinance, and the question whether the lot-holders should receive somewhat more or less profit would seem, after all, of such comparative insignificance, that it should not be permitted for a moment to stand in the way of so vast a public improvement.

For against the expected profits of the private persons concorned has to be set the risk, by no means slight, which they will have to incur in respect of typhoons and other accidents; while as regards both the rent to be paid by them, (\$800 per acre), and the large area (26 acres) for streets, which the public will obtain free of cost, the conditions under which this work will be undertaken are at least more operous than have been exacted from the adjoining lot-owners in the case of any previous reclamations. And when it is moreover con- combatted. sidered that an enterprise involving great, many and varied interests will be carried out with comparatively little, and it is hoped without any litigation, the Governor cannot but feel that the Colony is to be congratulated on the conclusion of the arrangement to be sauctioned by this Ordinance, which, whether it is, or is not, as perfect as it might have been, will in

any case confer incalculable benefits on the community. very possibly require amendment, will perhaps be best left for discussion in Committee; but the Governor thinks it well to refer briefly to an objection which he understands has been made to the third paragraph of the 6th clause of the published draft, by which compensation to dissentient lot-holders is left to the discretion of the Governor. It is needless to say that the Government has no desire to accord other than the fullest justice in respect of private rights; and though the provision in question has no doubt an arbitrary appearance, that aspect of it will probably disappear altogether from unprejudiced minds when the circumstances are fully considered. It should be remembered in the first place that the tenure of every one of the lot-holders is under a lease containing a condition, by which his land may at any time be resumed for a public purpose. the Surveyor General being in such case constituted the sole arbitrator—so that if the land of any lot-holder were to be, as it legitimately might be, resumed for this public purpose, the position created for him by a condition to which he has voluntarily submitted already, could hardly be regarded as preferable to that contemplated by the proposed enact-There is however a more important consideration to be taken into account The provision was presumably drafted, and sanctioned by the Secretary of State, on the assumption of the correctness of the opinion above referred to, according to which the frontage lot-holders have no legal rights in the foreshore. In this view they are strictly entitled to componention only in respect of the actual depreciation of their property by the reclamation in front of it; and as in the case of former reclamations here the value of the adjoining land has never, the Governor understands, been affected otherwise than favourably, it is very possible that the lot-holder, if in this case left to his legal rights alone, would obtain no compensation at all. But by the provision in question there can be taken into account the moral claims above mentioned: so that instead of being a hardship to the dissentient lot-holder, the clause in reality will operate for his protection. If however there should prove to be any lotholder who not only declines the agreement. which has received the approval of the great majority and is embodied in this Ordinance, but also prefers to stand solely

THE RECLAMATION ORDINANCE AGAIN. His Excellency - I should like if possible to get on with the Reclamation Ordinance. It would be well if objections to the ordinance should be made before the Ordinance is passed rather than later in the day. THE GOVERNOR AND THE CIVIL HOSPITAL PARTY.

Mr Chater—I sent a notice to the Colonial Secretary of a question, which, with your permission, I ask - Whether there is any objection to stating the circumstances under which permission was recently refused for holding a concert in the Public Hospital which had been prepared for the patients.

His Excellency-I will answer this question. The incident to which the Honorable gentleman referred has lately been the subject of remarks in the Engpress; and as I am bound in the case where a question is likely to be asked in Parliament, to supply the Secretary of State with the full particulars so that he can satisfactorily reply. I have addressed the 1889. Secretary of State on the subject. In order to save the time of the Council I have placed the despatch on the table, which may be

Mr Price feelingly replied as follows :-

Gentlemen. I beg to return you my warm and sincore thanks for the good feeling and kindness which has prompted you to present me with this parting gift and for the address which Mr Malsch has just read. I assure you that I prize both very highly indeed, coming as they do from brother officers with whom I have been for many years so closely associated and whose good opinion I value so highly. Both your beautiful souvenir and this valued address will ever remain with me and mine as a valued remembrance of the band that has so long united and which I am grieved to think is now being severed for ever, I look back with very pleasant feelings to the warm and fordial relations that have always subsisted between us. Mr Price then shook hands with all the members of the staff.

PRESENTATION OF A PUBLIC ADDRESS. An address from the community Hongkong was presented to Mr Price at 5.30 this afternoon in the City Hall. There was a large gathering of prominent citizens at the ceremony, and the Hon P. Ryrie presided.

Mr Ryrie, in making the presentation, said it gave him very great pleasure when he was asked to present to Mr Price the testimonial which he was now about to hand to him. That testimonial was signed he might say, by all the responsible and influential members of this community. It referred more especially to Mr Price's connection with the noble public works which he had designed, erected and completed in the colony during his time of office here (Applause.) In proceeding, Ryrie said-As my colleague in the Legislative Council now for many years you have always called forth my admiration on those occasions, (very few, I must say) when attacks have been made upon you on insufficient information. [Here follow signatures.] The address was accompanied by a souvenir in the form of a bank draft. Attached to the copy of the address read by Mr Ryrie was a minute by H. E. the Governor to the effect that he would use his influence with the Secretary of State for the Colonies to obtain permission for Mr Price to accept the souvenir. Mr Price, who seemed considerably affect-

ed, asked the indulgence of the meeting for the few words he wished to say in acknowledging the address and the kind words which had fallen from the lips his old friend Mr Ryrie. The sixteen years he had been a public servant in this colony represented a goodly portion of a man's entire life and few could hope in that period to avoid giving offence unwittingly. The Surveyor General of this Colony had pressed upon him by official obligations many duties, and among them was that of sometimes dancing on peoples' toes, if he might say so, and he trusted that although he had hid to do this occasionally, they would have found that he had not been a very willing per? former in these exercises and that his hornpipe was always a matter of duty and not pleasure (Laughter and applause.) He must decline to take all the credit for the public works that had been referred to as he had only been the instrument in carrying them out, they being due prima rily to the Governors under whom they were initiated and only secondarily to the Surveyor General. He felt most keenly his severance with the Colony at such a time as this when there were contemplation works of which an empire might be proud. In the carrying out of these he had hoped to have some share, but fate had decreed otherwise, and in his forced retirement he consoled himself with the reflection that he was giving place to a better and abler man who would at all events be able to do better justice to the post physically than he had done during the past few years. In conclusion he again expressed his warmest thanks for the address.

Hearty cheers were then given for Mr Price, after which the meeting separated.

NEWS BY THE GERMAN MAIL. The following are some additional telegrams from London papers of 16th to 19th

THE KARUN RIVER. Berlin, 18th Feb .- At the request of the Persian Government, Holland has placed an ominent hydraulic engineer at its disposal for the purpose of studying the Karun River, and, if possible, regulating It for navigation.

Feb. received by the German mail :-

Madrid, 18th Fob. - Telegrams received here from Morocco state that the Government of the Sultan is placing obstacles in the way of the re-eachlishment of the British cable at Tangier, and that the representatives of certain European Powers encourage this strange conduct on the part of the Sultan.

THE PHILIPPINE ISLANDS. Madrid, 17th Fob. -The Ambassadors of soveral European Governments and the American Minister have been ondeavouring to persuade the Spanish Government to allow more facilities to foreigners who want to invest their capital in land in the Philippine Islands and other archipelagues bo longing to Spain in the Pacific Ocean.

The Madrid Government has laid down, in a decree of the Minister for the Colonies. stringent regulations, declaring that only foreigners resident in the Philippine Islands, and duly registered in their respective Consulates, will be allowed to buy and possess houses or land, which they cannot transfer by sale, gift, or will to any of their heirs not resident in the Unlony

Directly the said residents leave the Colony, or go to reside elsewhere permanently, they must sell these lands and then is generally supposed. Another decree of the Minister panies. Societies, or enterprises of any kind will not be allowed to possess or buy lands or houses in the Philippines.

The Madrid papers highly approve those that all displomatic conflicts will thus he avoided. This is a singularly solfish policy, when Spain has noither capital nor means to make use of one-twentieth part of her vast archipelagoes in the Pacific Count. where the European Governments only recognised her nominal Sovereignty on condition that she would place no obstacles in the way of foreign trade and enterprise. as is stated in several Treaties made since

These cakes, when they are just baked and still warm, look more like coment, and when they become cold are harder, if possible, than stones.

RAILWAYS IN ASIA MINOR. Berlin, 17th Feb. According to a financial paper in Borlin, the Sultan has just sanctioned the constitution of the Joint Stock Company which the German Bank is about to form for the laying down and working of a railway, four hundred and sixty kilomètres in length, from Ismid to Angora, for which it has been granted the concession. The Island Scutary line, kilomètres long, has already been worked by the German Bank since the 7th ult. after payment of the stipulated sum of eight million two hundred and fifty thousand

THE SAMOAN QUESTION. Washington, Feb 18.-Mr Bayard, Secretary of State, in the course of an interview with some newspaper correspond. ents on the subject of the political situation, is represented to have declared that a military spirit should be discouraged in a Republic, and that to encourage such a spirit in the United States would soon lead to war. Commenting upon the popular excitement caused by the Samoan incident, affection. Mr Bayard is stated to have said : --

I do not believe that the people want to go to war about Samoa. There is no occacion for it; but if they do want war they must get another Secretary of State. My policy has been to humanise International relations as regards the principle of arbitra- the Hangut. tion, on which they could be extended with vast benefit to mankind. I should especially like to see the neutralisation of private property applied to property on sea as well as on land. I believe, however, that on two-thirds of the globs the property of non-combatants is, by the present usages of war, regarded as the lawful prize of war. During war on land the soldier who takes possession of private property without payment is regarded as a brigand, yet on sea a man's whole fortune invested in a ship's

cargo may be swept away without redress.' Mr Bayard further advocated the neutralisation of certain localities useful to all the Powers-for instance, the Suez Canal-and said that a similar arrangement would have to be entered into for the protection of the interests of the United States, should the Panama Canal be completed. He had sought, he said, to apply the principle of neutralisation by International agreement to the Samoan Islands, and regarded the rejection of the Chinese Treaty and the Fisheries and Extradition Treaties by the Legislature as unfortunate for the United

States POLITICS IN GERMANY. Berlin, 18th Feb.-The Emperor accorded Prince Bismarck this afternoon an audience of more than half an hour's duration. PROTECTION IN SPAIN. Madrid, Feb. 17.—The Spanish Governmont has opened negotiations with several foreign Governments, that have Treaties of Commerce with Spain, which Treaties will not expire before 1892. The Spanish Government wants to induce these countries, especially Germany, Sweden, and France, to assent to some modifications in their Treaties that would allow Spain to make concessions to the Protectionists, who are pressing Senor Sagasta to raise the duties

on foreign imports. The agricultural and the manufacturing interests have suffered so much from the depression of trade in the last two years that they want to recoup themselves by restrictions on their foreign competitors in the home markets. Indeed, Protectionist idoas are gaining ground even in the ranks of the Liberal Party, which makes it very doubtful whether Spain will renew the Treaties of Commerce which expire in

THE EMPERON WILLIAM AND THE CZAB. Berlin, 17th Feb. -So far as is known as yet, the Czar, escorted by a large squadron of men-of-war, will meet the Emperor William at Kiel on his way to Copenhagen, and will probably visit him in Berlin before returning to St Petersburg. The Berlin visit depends chiefly on the date of the Czar's arrival at Copenhagen, on which point nothing certain can be said at present but I have reason to believe that it will be later

Humburg, 17th Feb. I am informed that for the Colonies declares that foreign Con. the Car will probably return the visit of the German Emperor in the month of June next, when he will meet the Envieror William at Kiel. The Empress of Russia will at the same time pay a visit to the Danish decisions of the Minister, and say they are Royal family at Copenhagen The Grand designed to prevent the encroachment of Duke of Hesse, father of the Princess Foreign Powers, especially Clermany, and Henry of Prussia, is also expected to visit Kiel at the time of the Imperial meeting.
